Insulated bottle with activated carbon filter (740ml)

The product illustration is indicative only and may differ slightly

Read the instructions carefully before use

1. Before first use, immerse the inner activated carbon filter in water for 10 minutes to activate it.
2. The filter has a filtering capacity of up to 300 litres of water (equivalent to 400 refills).
3. Do not fill the bottle to the top. Leave a little space to avoid overflowing when closing the cap.
4. Use a soft sponge and mild detergent to clean the stainless steel bottle.
5. Avoid knocks, as they may damage the insulation of the stainless steel (type 304) bottle.
6. For optimum filter performance, it is recommended that the water temperature does not exceed 60°C.
7. The product is supplied factory-sealed. A slight odour on first opening is to be expected and fades after cleaning.

Filter storage
(if not used for a week)

1. *Remove the filter straw from the bottle and gently shake off the excess water. Then leave it to air-dry in a cool place. Once it is completely dry, wrap it in cling film or place it in an airtight bag. For maximum protection against bacterial growth, it is best stored in a safe place or in the fridge.*
2. *Also, make sure the inside of the insulated bottle is completely dry before storing it.*

⚠ Do not place the bottle in the freezer when it contains liquids, as the expansion of the contents may cause it to break.

⚠ Do not use the container to store acidic substances, as they may degrade or corrode its material.

⚠ Do not place the bottle in boiling water or in a microwave oven, as the heat may cause the body to deform.

⚠ Do not use wire scouring pads or strongly corrosive cleaners, as they may scratch the surface of the stainless steel insulated bottle.

⚠ Avoid filtering juices (with fibres or pulp), as there is a risk of clogging the filter. For drinking juice, it is best to use a straw without the filter.

PRODUCT WARRANTY

Thank you for choosing our insulated bottle. The product is covered by a **2-year warranty**.
In the event of a manufacturing defect (not caused by misuse), immediate replacement with a new product is provided within 15 days of the date of purchase.

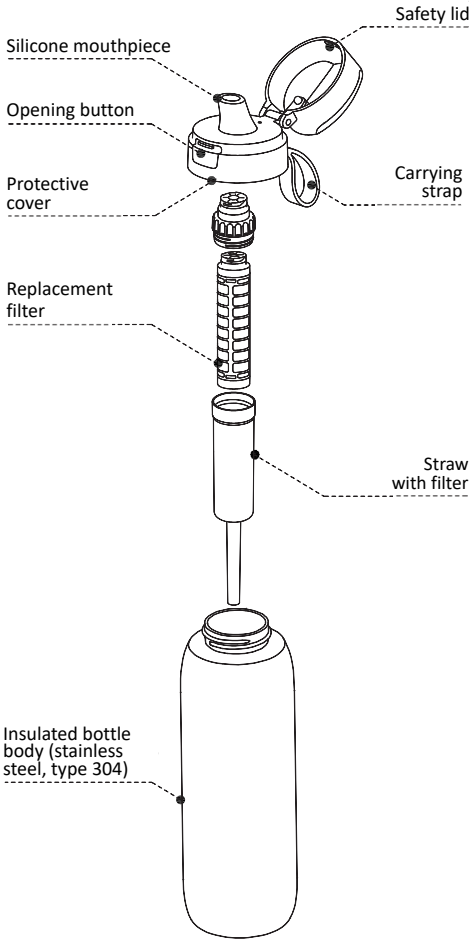

Product parameters

Item	Parameters
Name	304 stainless steel insulated bottle
Size	ϕ78×260
Capacity	740 ml
Net weight	395 gr
Colour	Dark green / White
Water purification capacity	300 l (equivalent to 400 refills)
Material	PP lid + PP filter with activated carbon + 304 stainless steel bottle
Suitable water	Mains water monitored by the municipal authorities and fit for human consumption

Pack contents

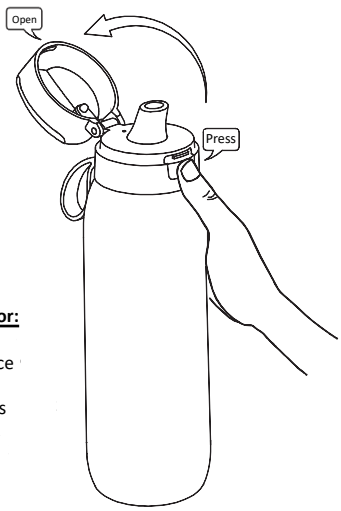

Item	Quantity
Water bottle	1 pc
Specifications / manual	1 pc

Product description

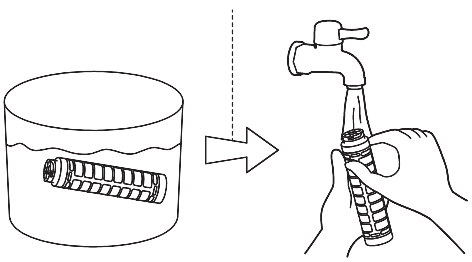

Use

Designed for easy one-handed opening and drinking straight from the soft silicone mouthpiece. Opens quickly with a single click.

Suitable for:
- School
- The office
- Sports activities
- Travel & outings
